# Pt. Ravishankar Shukla University, Raipur (2018-2019)

# Master of Philosophy in Bioscience

The M. Phil. examination shall follow the following patterns:

# Allotment of Marks

		otment of Warks	Marks
1.	Theory/ Lab Course Theory-I	Research Methodology, Advanced Tools & Techniques, Quantitative Data Analyses and Computer Fundamentals	100
2	Theory-II	Modern Biology	100
3.	Theory-III		100
3.	OR		100
	Lab Course-I		300
Total Marks			500
4.	Seminar	Based on theory	50
	Dissertation	Seminar based on dissertation	50
5.	Dissertation	Script Writing	75
		Viva-voce	25
TD ( 13/4 1		,,,,,	200
Total Marks Grand Total			500

(b) The distribution of 100 marks of practical is as follows:

Practical 60 Viva-voce 20 Practical record 20

- (c) The third theory course shall be applicable to the subjects that do not have lab courses.
- (d) The assessment of the Seminars shall be done by the internal examiners. The assessment of the practical records, carrying 20 marks shall be done at the time of the annual examination jointly by the internal and external examiners.
- (e) The result will be computed by combining the marks of the various courses and the dissertation.

Wilham 9.18

# Theory Paper I

# Research Methodology, Advanced Tools & Techniques, Quantitative Data Analyses and **Computer Fundamentals**

### Unit-I Research Methodology

Types of data, Data collection, Methods and tools of data collection Introduction to research methodology: Scope Research problem: Identification, Selection, Formulation of research objectives Research design: Components, Importance, Typology

Research ethics, Institutional ethics committee for human and animal research Plagiarism - Pitfall

Patents and IPR: Patent laws, process of patenting a research finding, Copy right, Cyber laws

#### Advanced Tools & Techniques Unit-II

Microscopic techniques -Electron microscopy and Confocal microscopy Principle, protocol and application of Chromatography – GLC & HPLC, Electrophoresis and its application PCR, Real time PCR, DNA microarray, DNA sequencing Protein microarray and Protein sequencing

#### **Quantitative Data Analyses Unit-III**

Hypothesis testing Normal and Binomial distributions and their property Tests of significance: Student t-test, F-test, Chi-square test Correlation and Regression ANOVA – One-way and Two-way, Multiple-range test

#### Unit-IV **Computer Fundamentals**

Introduction to spreadsheet application, features and functions, Using formulas and functions, Data storing, Generating charts/ graph and other features. Tools used may be Microsoft Excel or any other comparable/similar tool. Introduction to presentation tool, features and functions, Creating presentation, Customizing presentation, Showing presentation. Tools used may be Microsoft Power Point or any other comparable/similar tool. ICT: meaning, advantages and uses; Basics of internet, e-mailing, Search engine, like Google, Yahoo, MSN, Entrez including Pub med, Literature search techniques. Web of Science, Citation Index: Science Citation Index (SCI), h-index, i-10-index. Journal Impact Factor (JIF) Features for Statistical data analysis using computers and software, Microsoft Excel Data Analysis Tool Pak, SPSS

## Lab Course:

- Construction of frequency distribution curves 1.
- Effect of size of class interval on the pattern of frequency distribution
- Construction of cumulative frequency distributions
- Computation of measures of central tendency and dispersion based upon grouped data and ungrouped data

Manhama. 18

- 5. Hypothesis testing: Exercises on *t*-test, *F*-test &  $\chi^2$ -test
- 6. Computation of correlation coefficient and regression constants
- Data analyses using MS Excel ToolPak: Descriptive statistics, ANOVA, Correlation and Regression, t-test
- 8. Computation of correlation coefficient and regression constants using SPSS
- 9. Internet application with special reference to literature search
- 10. Performance of SDS-PAGE analysis
- 11. Study of isoenzyme pattern
- 12. Performance of RAPD analysis

Molecular mechanism of biosignal transduction

# Theory Paper II Modern Biology

## Unit-I Biosignaling

Molecular mechanism of signal transduction, Gated ion channels Receptors enzymes; Insulin receptor, Guanyl cyclase G- protein- coupled receptor and second messengers Phosphorylation as a regulatory mechanism Regulation of cell cycle by protein kinase Quorum Sensing

# Unit-II Immunotechnology

Organization of Immunoglobulin genes: Light & Heavy chain, variable & constant region.

Generation of antibody diversity: Light and heavy chain gene recombination,

Heavy chain constant region genes, Class switching.

Membranous and secreted immunoglobulin.

Pt. Ravishankar Shukla University, Raipur

Mail 10, 9.18

Synthesis and production of immunoglobulin: Monoclonal antibody, Designer antibody.

Antigens and antegenicity. Antigen-antibody interaction.

Immunodiagnostics: Precipitation reactions, Haemagglutination,

Immunofluorescence, Radio and Enzyme immuno assays, Immunoblotting.

Immunoprophylaxis: vaccines and vaccination.

## Unit-III Plant Tissue Culture

Laboratory requirement and general techniques of plant tissue culture

Tissue culture media

Cell culture

Cellular totipotency, morphogenesis.

Somatic embryogenesis

Haploid production.

Protoplast isolation, culture and fusion.

Clonal propagation

# Unit-IV Seed Technology

Seed storage: biochemical and molecular basis of viability and vigour tests Testing Techniques for Seed storage behaviour: orthodox and non-orthodox Seed age & ageing markers: Telomeres and telomerase. Seed priming technology.

Cryogenic storage biotechnology

Seed quality improvement: Seed Protein, Carbohydrate and Oil quality.

Seed Germination: Biochemical and molecular basis of germination methods, germination specific markers

Seed dormancy: Biochemical & molecular markers and hormonal control.

Seed testing: GM crops, Plant molecular farming.

# Lab Course (8-10 exercises out of the list given below):

- 1. Determination of percent and rate of germination of seed
- 2. Determination of seed viability
- 3. Determination of level of electrolytic leakage in fresh and aged Moong seed
- 4. Determination of the rate of lipid peroxidation in fresh and aged seeds
- 5. Determination of Ag-Ab reaction through double diffusion technique
- 6. Determination of Ag-Ab reaction through counter current immunoelectrophoresis (CIEP)
- 7. Demonstration of Ag-Ab reaction through immunoelectrophoresis technique
- 8. Demonstration of the technique of radial immunodiffusion (RID)
- 9. Performance of sandwich DOT ELISA test for antigen
- 10. Study of Haemagglutination with the help of commercial kit
- 11. Preparation of Murashige and Skoog (MS) media
- 12. Performance of shoot-bud culture by an explants in MS media
- 13. Multiplication of shoot induction in MS solid media
- 14. Multiplication of shoot induction in MS liquid media
- 15. Study of somatic embryogenesis using zygotic embryo of a given plant
