Pt. Ravishankar Shukla University Raipur (C.G.)

Certificate Course in Econometrics and Mathematical Economics
Syllabus

Programme Structure

Duration: Six Months

Max. Marks : 200

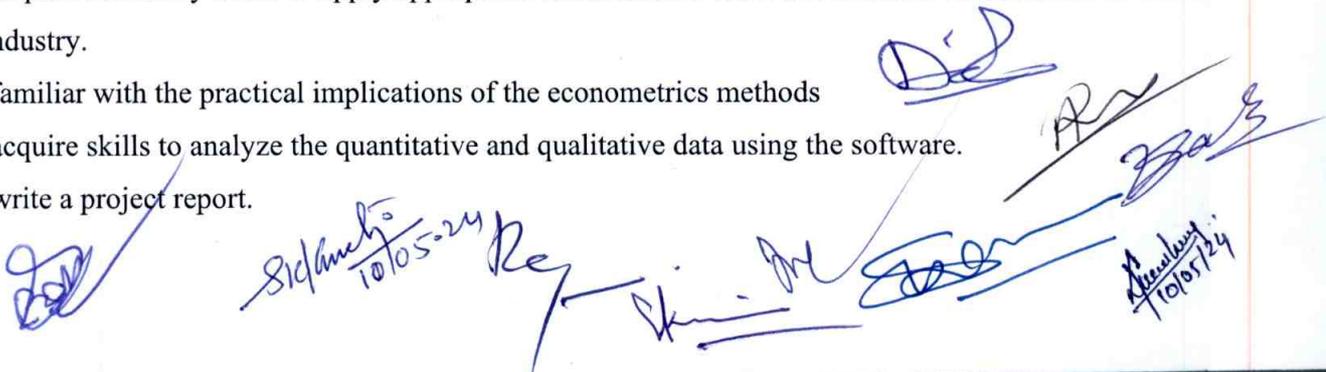

Scheme of the Examination

Papers	Name of papers	Marks
First	(A) Fundamentals of Econometrics and Mathematical Economics.	80
	(B) Internal Exam.	20
	Total	100
Second	Project work	100
	(i) Project report writing	50
	(ii) Project work presentation	30
	(iii) Project work viva-voce	20
Total marks		200

Paper I: Fundamentals of Econometrics and Mathematical Economics (Code: Eco/E and M-0204-22)

Course Outcomes: The objective of this course is to provide the basic knowledge of econometrics and mathematical economics that is essential equipment for any serious economist or social scientist. The course will enable the students to compete in competitive exam like NET-JRF, GATE-ECONOMICS and others. At the end of the course the students are expected:

1. To get basic knowledge about econometrics and mathematical economics
2. To acquire necessary skills to apply appropriate econometrics tools and methods in academia as well as industry.
3. To familiar with the practical implications of the econometrics methods
4. To acquire skills to analyze the quantitative and qualitative data using the software.
5. To write a project report.

Signatures and dates: 10/05/24, 10/05/24, 10/05/24, 10/05/24, 10/05/24.

Syllabus

Unit- I	<p>Introduction: Nature and scope of econometrics and Econometric Analysis, Steps involved in Econometric Analysis.</p> <p>Introduction to Classical Linear Regression Model: Two variable classical linear regression models, Assumptions of Classical Linear Regression Model: Multicollinearity, Heteroscedasticity and Autocorrelation</p>
Unit- II	<p>Ordinary Least Square estimators: Properties of Ordinary Least Square estimators, the Gauss Markov theorem, scaling and units of measurement; confidence intervals.</p> <p>Regression analysis: Objective, Statistical Analysis, and Interpretation of results, Hypothesis Testing-Types of Hypotheses, Test statistic, Critical Region.</p>
Unit- III	<p>Hypothesis testing: Level of significance and confidence interval approach; Goodness of Fit(R^2): Concepts of Explained Sum of Squares (ESS)-Residual Sum of Squares -Total Sum of Squares.</p> <p>Multiple Linear Regression Model: Interpretation of the model, Statistical Analysis, Interpretation of the results, Model misspecification: R^2 vs Adjusted R^2.</p>
Unit- IV	<p>F Statistics : Application of F Statistics-Overall significance of the model-Equality between two regression coefficients- Testing the validity of linear restricted and Unrestricted models.</p> <p>Simultaneous equation model: specification – identification – rank and order conditions – problems. Introduction to Time Series Analysis: Forecasting Time Series, Concept of stationery forecasting with ARIMA Modeling using softwares.</p>
Unit -V	<p>Preliminaries Logic and proof techniques: sets and set operations; relations; functions and their properties; number systems, sequence, series.</p> <p>Differentiable functions: characterizations, properties with respect to various operations and applications; Second and higher order derivatives: properties and applications. Matrices, Vector spaces, Calculus and its Applications. Difference and Differential equations: Its application, Differentiation, Integration.</p>

Paper II: Project-Report and Viva- Voce (Code: Eco/E and M-0204-23)

The students are required to submit a Project Report. The project would enable them to learn the applications of the econometric techniques for preparing project reports. The project report should be 25-30 pages and consists of the statement of the problem, review of literature, theoretical and empirical methodology, sources
