- 5.2.3 The overall design of the skill development component along with the job roles selected should be such that it leads to a comprehensive specialization in the proposed domain;
- 5.2.4 In case NOS is not available for a specific area/job role, the University will get the curriculum development for this in consultation with industry experts;

While doing so, they should work towards aligning the skills components of the curriculum with the NOSs developed by the respective Sector Skill Councils.

6.4 The practical/hands-on portion of the skills development components of the curriculum should be transacted normally in face to face mode, wither within the institution or at the location of a specified industry partner. The emphasis should be on learning outcome and not the input and processes. The general education component of the curriculum may be transacted in any mode without compromising on quality.
